

MBTA garage – BOS concerns

6/16/2008 draft

1. The Board's preference is for a station in West Natick
2. No Town funds would be committed
3. We will see a proposal including timeline, design, traffic impacts, etc.
4. We would like data on the percentage of current and future garage commuters that are Natick residents
5. There may be a need for mitigation including traffic and improvements to the Natick Center station - both Natick stations will be made fully accessible
6. The T will schedule opportunities for public input
